

# NU-FORM FIRE UK CASE STUDY

## Key Project Criteria

Case Study Ref:	NFF-07
Project:	Royal Nedalco (Cargill)
Value:	£ 900,000.00
Design Standard:	NFPA

## **New Alcohol Production Plant**

This prestigious contract has now been completed and again Nu-Form demonstrated their expertise in the special hazard sector.

The project includes deluge water spray systems to storage tanks, foam pourer system to bunds, deluge sprinkler protection to distillation plant, water spray cooling to structures and fire hydrants. The fire water storage tank, diesel fire pumps and foam bladder tank were also provided by Nu-Form.

Medium Velocity water spray deluge systems to flammable liquid storage vessels

Foam Pourer System

Diesel Fire Pump within Pre-Packaged Kingspan Pumphouse

Deluge Valves

Foam Bladder Tank
