

Contract Case Study

JCB Wrexham

Contact Value: £1.5 million
Design Standard: FM Global
Project Brief: Nu-Form Fire UK designed and installed Fire Protection Systems at JCB Sites in Wrexham

The systems provided include:-

- Sprinkler Systems to Production Areas, Storage areas and Offices/Amenities
- High Velocity Water Spray System
- Water Storage Tanks and Fire Pumps

Two sites at JCB Wrexham are protected by Sprinkler Systems, Water Spray and Water Supplies by Nu-Form Fire UK. Most of the buildings were existing and operational when the systems were installed and one large unit was “New Build”.
